

Asha Golveo

Sacramento, CA 95835

628.236.9453 · agolveo@gmail.com · ashagolveo.github.io/ashag-portfolio

Human-centered engineer with experience in designing and testing complex interactive systems. Strong foundation in agile delivery, stakeholder alignment, project management and systems thinking. Combines deep technical expertise with a passion for improving user experience and performance, with a focus on optimizing cross-functional collaboration, usability, and process design. Skilled in managing complex projects across engineering, product, and operations teams.

EDUCATION

Master of Science in Human Factors

Embry-Riddle Aeronautical University (May 2026)

GPA 4.0

Bachelor of Arts in Psychology (pending)

CSU East Bay

Bachelor of Science in Accounting

CSU Sacramento

KEY SKILLS

Human-Computer Interaction (HCI) • Fullstack Software Development • API Design & Integration • Error Mitigation • Systems Engineering • A/B Testing • Usability Testing • Agile Collaboration • Root Cause Analysis • Risk Management • Problem Resolution • Critical Thinking • System Architecture • User Requirements Analysis • Task Analysis • Stakeholder Communication • Cross-Functional Collaboration • Technical Documentation • API Lifecycle Management • SQL • Ruby/Rails • React • Python • Javascript

PROFESSIONAL EXPERIENCE

Parola Tax Services, San Francisco, CA

Dec 2023 – present

Tax Professional

- Conduct structured intake interviews to understand clients' financial histories and goals, obtain necessary documentation, resolve discrepancies, and meet tax deadlines.
- Manage and verify sensitive financial data with high accuracy, consistency, and compliance.
- Translate complex tax regulations into clear, actionable guidance, reducing misinterpretation and supporting informed decision making for clients with varying levels of financial literacy.
- Seasonal positions at TurboTax and H&R Block

Provi, previously SevenFifty, New York, NY

Dec 2021 – Aug 2022

Engineering Manager

- Designed onboarding workflows and knowledge transfer processes that improved team performance and reduced confusion for new engineers.
- Collaborated with product managers to scope, prioritize, and plan sprint work, ensuring requirements aligned with client goals, system constraints, and stakeholder needs.
- Authored technical specs, user stories, and acceptance criteria that incorporated usability considerations and clarified intended user behaviors.
- Led cross-functional planning for new features and system stability work, balancing technical feasibility with user experience and operational impact.

Casper, New York, NY

Jun 2019 – Jul 2021

Senior Software Engineer, Tech Lead

- Led planning, development, and testing of a vendor system migration, analyzing existing workflows and redesigning processes to reduce manual effort, human error, and operational friction.
- Facilitated alignment between engineering, product, and customer support teams, ensuring that technical decisions reflected user needs and technical constraints.
- Performed use error analysis by tracing user reported issues across technical systems and human workflows, identifying root causes and implementing mitigations to reduce recurrence and operational risk.
- Developed interactive dashboards in React and SQL, providing operations and customer experience teams with vital data to assist in planning and forecasting.
- Contributed to structured documentation and traceability practices supporting validation and quality assurance processes.
- Designed and conducted usability evaluations, including task analysis and observation, to identify use related risks and usability failures.

Kickstarter, New York, NY

Jun 2015 – Dec 2018

Software Engineer

- Led an internationalization initiative implementing currency conversion on the project page, improving usability for global users by aligning interface behavior with local expectations and mental models.
- Partnered with product, design, and engineering teams to deliver guest checkout functionality, conducting task flow analysis and A/B testing to reduce friction and increase completion rates.
- Integrated risk management techniques into the engineering workflow by identifying edge cases, evaluating technical failures, and assessing user actions for potential system errors to implement preventative engineering controls.
- Contributed to API lifecycle management on the GraphQL API team, collaborating with diverse engineering teams to develop technical documentation, establish scalable style guides, enforce consistency, and improve developer experience across internal systems.
- Integrated risk identification techniques into feature development by evaluating edge cases and potential user misuse scenarios, implementing preventative controls to mitigate system level failures.

Moz, Seattle, WA

May 2014 – Apr 2015

Software Engineer

- Facilitated cross-functional collaboration between Design and Engineering teams to drive UI/UX enhancements across a multi-product suite, ensuring alignment with usability goals and product standards.
- Supported iterative design cycles by validating assumptions, refining prototypes, and implementing enhancements based on qualitative and quantitative user insights.
- Implemented web analytics to enhance reporting of user activity data collection.

ADDITIONAL EXPERIENCE

- **Assistant Project Manager**, McWong International, Sacramento, CA June 2009 - Aug 2013
- **Accounting Associate**, Exponent, Menlo Park, CA Sep 2006 - Oct 2007

VOLUNTEER EXPERIENCE

- **Sutter Health, Ambulatory Care Unit** Aug 2025 - present
