

# ASHA GOLVEO

*Human Factors & Usability Specialist | Technical Product & Systems Background*

San Francisco, CA • 628.236.9453 • agolveo@gmail.com • ashagolveo.github.io/ashag-portfolio

## PROFESSIONAL SUMMARY

---

Human Factors Engineer and technical systems professional with 10+ years of experience developing and supporting complex digital products in Agile environments. Specialized in evaluating how people interact with technology in high-stakes and operationally complex contexts, with graduate research focused on usability and decision-making in digital health systems. Experienced in cross-functional collaboration across engineering, product, operations, and customer-facing teams, with strengths in use error identification, task analysis, and translating user and business needs into practical system improvements.

## EDUCATION

---

### Master of Science, Human Factors

Embry-Riddle Aeronautical University • GPA: 4.0

#### Capstone: Dexcom G7 Companion App Usability Evaluation

- Designing a formative usability study evaluating how adults 65+ interpret and respond to predictive hypoglycemia alerts in a CGM companion application.
- Applying task analysis, think-aloud protocol, scenario-based usability testing, and use-related risk identification; study design aligned with FDA human factors guidance and IEC 62366.

### Post-Baccalaureate Coursework, Psychology

CSU East Bay • Cognitive psychology, experimental psychology, statistical methods, physiological psychology

### Bachelor of Science, Accounting

CSU Sacramento

## CORE COMPETENCIES

---

**Human Factors & Usability:** Usability Evaluation • Task Analysis • Think-Aloud Protocols • Use Error Analysis • Risk Identification • Human-Computer Interaction • FDA Human Factors Guidance • IEC 62366

**Technical:** SQL • React • Ruby/Rails • Python • JavaScript • API Design • System Architecture

**Collaboration & Product Delivery:** Cross-Functional Collaboration • Stakeholder Communication

• Requirements Documentation • Agile Development • Feature Scoping

## PROFESSIONAL EXPERIENCE

---

### Owner & Tax Specialist | Parola Tax Services, San Francisco, CA

*Dec 2023 – Present*

- Manage end-to-end client engagements in a highly regulated environment, including intake, workflow coordination, compliance review, issue resolution, and delivery of time-sensitive financial documentation.
- Translate complex tax regulations and procedural requirements into clear, actionable guidance for clients with varying levels of financial and technical literacy.

### Seasonal Tax Expert | Intuit TurboTax, Oakland, CA

*2025 – present*

- Supported customers using TurboTax digital filing platforms by providing tax guidance, workflow support, and technical troubleshooting across complex filing scenarios.
- Diagnosed and resolved both tax-related and technical platform issues, including account access problems, software behavior questions, workflow interruptions, and filing errors.

### Seasonal Tax Specialist | H&R Block, San Francisco, CA

*2023 – 2025*

- Supported high-volume client tax preparation workflows in a fast-paced, customer-facing environment requiring accuracy, efficiency, and regulatory compliance.
- Conducted client interviews to gather, verify, and interpret financial information while identifying inconsistencies, missing documentation, and potential filing risks.

**Engineering Manager** | **Provi (formerly SevenFifty)**, remote*Dec 2021 – Aug 2022*

- Owned the product backlog for a cross-functional engineering team: defined features, authored user stories and acceptance criteria, prioritized sprint work, and ensured requirements were ready for execution, functioning as the primary Product Owner in an Agile environment.
- Collaborated with product managers to scope features, develop timelines, and align technical feasibility with business priorities and stakeholder needs, including escalation point for in-sprint tradeoff decisions.
- Documented detailed customer journeys, process flows, and solution descriptions to maintain conceptual and technical integrity across the team.
- Designed onboarding workflows and knowledge transfer processes that reduced new engineer ramp-up time and improved team performance.

**Senior Software Engineer, Tech Lead** | **Casper**, New York, NY*Jun 2019 – Jul 2021*

- Developed interactive React and SQL dashboards providing operations and customer experience teams with actionable data for planning and forecasting.
- Led cross-functional planning across engineering, product, and customer support teams to deliver new features and system improvements, balancing technical feasibility, user experience, and business constraints.
- Directed a vendor system migration end-to-end: analyzed existing workflows, identified friction points, redesigned processes, and coordinated multi-team delivery on schedule.
- Conducted use error analysis by tracing user-reported issues across technical systems and human workflows, identifying root causes and implementing engineering controls.
- Designed and conducted usability evaluations including task analysis and observation to identify use-related risks and improve product design.

**Software Engineer** | **Kickstarter**, New York, NY*Jun 2015 – Dec 2018*

- Partnered with product and design teams on guest checkout functionality: conducted task flow analysis and A/B testing to identify friction, drive tradeoff decisions, and increase checkout completion rates.
- Led an internationalization initiative implementing currency conversion and locale-aligned interface behavior, improving usability for a global user base by aligning the product with local mental models.
- Contributed to API lifecycle management on the GraphQL team: developed technical documentation, established style guides, and improved developer experience across internal systems.
- Integrated risk identification into feature development by evaluating edge cases and potential use error scenarios.

**Software Engineer** | **Moz**, Seattle, WA*May 2014 – Apr 2015*

- Facilitated cross-functional collaboration between Design and Engineering to deliver UI/UX enhancements across a multi-product suite, ensuring alignment with usability goals.
- Supported iterative design cycles by validating assumptions and implementing refinements based on qualitative and quantitative user insights.

**VOLUNTEER EXPERIENCE**

---

Ambulatory Care Unit Volunteer • Sutter Health, Sacramento, CA • Aug 2025 – Present

*Gaining direct exposure to clinical workflows, patient-facing healthcare communication, and healthcare system operations.*
